

Trouble-Free Coolant Recycling System
Essential for Coolant Tank Cleaning.

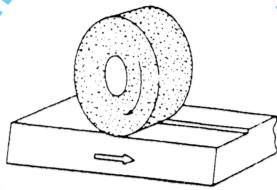

PAT

New Cuspon Cleaner

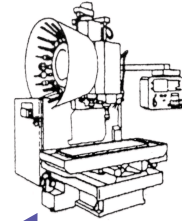

Cuspon Cleaner made easy everything you need!!

Easy Handling Mobility, Innovative Sludge Filtering process and, Desiccation Disposal System.....etc. These Multi Functions enhance Work Efficiency!!

GRINDING MACHINE

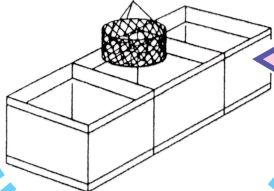

CUTTING MACHINE

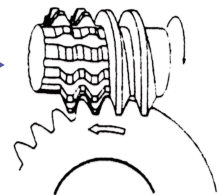

**ONLY CONSUMABLE
IS FILTERING BAG.**

PHOSPHORIC ACID
TREATMENT

**OPERATED BY
COMPRESSED AIR.**

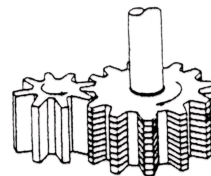

HOB&GEAR MACHINE

NEW CUSPON CLEANER

etc
?

GEAR SHAVING

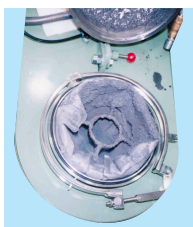

AFTER SPIN-DRYING
PROCESS.

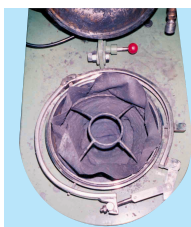

EASY DISPOSAL.

EASY DISPOSAL.

AFTER SPIN-DRYING
PROCESS.

HANDLING LIKE VACUUM
CLEANER

MITAKA
INDUSTRY CO., LTD.

Remarkable Features

1. Able to perform cleaning process without draining the coolant from the tank.

2. Able to extend coolant life.

→By removing sludge from coolant tank on regular basis, it will prevent from decomposition and help to achieve longer life of the coolant.

3. Operated by only compressed air.

→Power source requires only compressed air. No electric source needed.

4. Able to perform dehydrating filtration.

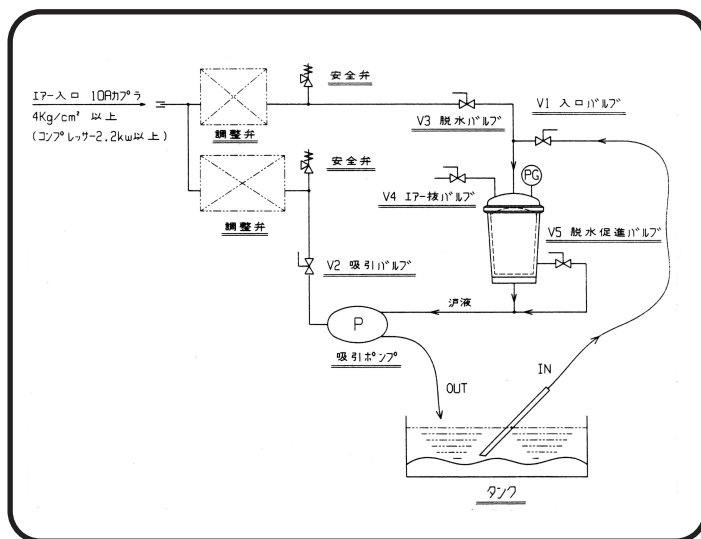

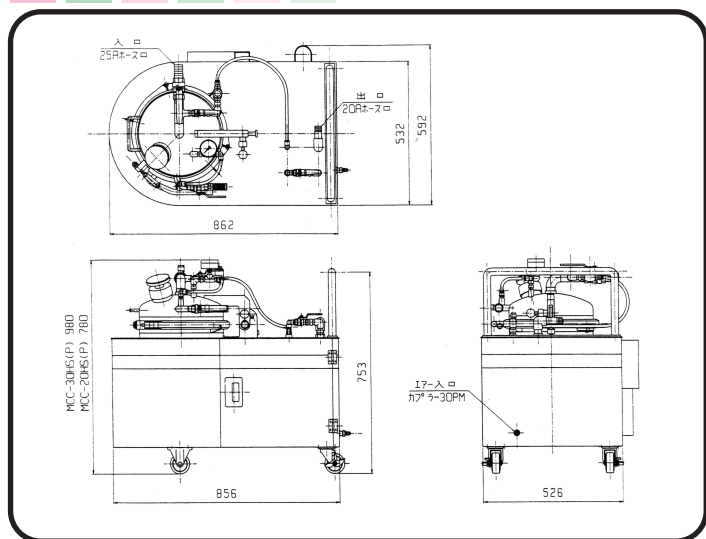

→Easy disposal of filtered sludge.

5. Easy set up and compact design.

→Easy set up and Compact design will enhance its mobility and work efficiency.

6. Economical

→Only consumable is filter bag. Please apply Diatom Earth into the filtering bag for a better filter and desiccation result.

Main specification

		Pump capacity	Sludge amounts	Body weight	Material		
					Body	Pump	Valve
Neutrality	MCC-20HS	MAX50L/min	MAX20L	85kg	SUS	AL	BC
	MCC-30HS	MAX50L/min	MAX30L	100kg	SUS	AL	BC
Acidulous and alkalecence	MCC-20HSP	MAX50L/min	MAX20L	85kg	SUS	PP	SUS
	MCC-30HSP	MAX50L/min	MAX30L	100kg	SUS	PP	SUS
Accessories Vacuum heads & hose (3 each m) ・ Filter bag (10 pieces) Operation manual (a copy)							

Please note: Compressor pressure level should be corresponding with 2.2Kw or more.
